

How are you going to use the images?

Hello! I work for the Medical Faculty at the University of Oslo.

I would like to use an image from for educational purposes, in an academic setting.

The picture would be used in an e-learning course about Thyroid Disease. The e-learning course is published on the internet, on a joint digital learning platform developed by the four leading Medical Faculties in Norway. The website is used by present and former medical students to supplement classroom learning and hospital training. It is free to use and open access.

<https://www.statpearls.com/ArticleLibrary/viewarticle/30147>

The image is called: Right thyroid nodule, multinodular goiter  
Contributed by Ahmet Selçuk Can, MD

Yes, you may use the image. Please, make sure to cite StatPearls Publishing when using. Thank you and enjoy the day, Cynna

Are there any specific conventions for attribution? Do I need a license? Can I use this conversation as proof of permission?

Is it adequate if I cite like this:

\*image\*  
\*image text\*  
Reprinted from Thyroid Nodule (link), with permission from StatPearls Publishing.

And then put a complete reference in our bibliography.

Yes perfect

Great, thank you. I will download this conversation as proof of permission.

Have a great day!

You too!
